Education Background

● Schooling

*St. John's Matriculation Higher
Secondary School*
X-Completed in 2018

- St. John's Matriculation Higher Secondary School (CSE)

XII-Completed in 2020

● Bachelor of Engineering (CSE)

Panimalar Institute of Technology
Completed in 2024

Skills

- PYTHON
- HTML
- CSS (Tailwind)
- JAVA Full Stack
- REACT JS
- Flutter

Tools

- FIGMA
- GIT
- Postman

About Me

Motivated Computer Science student seeking entry level position. Familiarity in Python, and web development like React JS, CSS and hands on knowledge in Java. Strong problem-solving and collaboration skills.

Internship

- I worked as a freelance front-end developer for a startup company, where I focused on building responsive and user-friendly web applications.
- Completed internship at Arm tech, specializing in PC assembly and networking. Gained hands-on experience in configuring, troubleshooting, and optimizing computer systems for enhanced performance.

Projects

- Developed a responsive Nike landing page using React JS with Tailwind for layout styling and smooth animations, focusing on a modern, engaging design. Deployed on vercel: [Nike](#).

● Project (college) Sign Language Translator,

developed using advanced technologies like YOLO (You Only Look Once), machine learning (ML), and deep learning (DL), By leveraging YOLO for real-time gesture detection and ML/DL algorithms for accurate interpretation, this system can recognize and translate sign language gestures into written words.

● Smart Park,

Built a role-based e-commerce website using React JS and Tailwind CSS for a sleek, responsive interface, powered by a MySQL database and Spring Boot backend to provide efficient data management and secure user authentication .

Languages

- Tamil
- English

Strength

Quick Adaptability and Like To Learn New Technologies.
